

Solar Thermal Entry Level Training

Prerequisites:

Basic Math & Reading Skills
(8th-9th grade level)

Schedule:

40 classroom hours
with hands on traing included!

Training follows NABCEP learning objectives:

The Solar Heating Entry Level Learning Objectives include six (6) skill sets:

1. Conducting a site analysis , including load analysis
2. Identifying SH safety practices, standards, codes and certification
3. Identifying systems for specific climates and applications
4. Identifying proper orientation and installation methods
5. Identifying proper use of balance of system components and materials
6. Identifying common SH maintenance items

Tuition:

\$900.00 (Training)

\$165.00 (NABCEP Entry Level Exam)

NABCEP Testing Information from their Website:
Individuals passing the NABCEP Entry Level Exams should not be confused with NABCEP Certified PV Installers or NABCEP Certified Solar Heating Installers. The latter can only be achieved by highly experienced individuals who have passed a much more rigorous examination and have demonstrated the capability to supervise complete system installations, and who have a detailed working knowledge of the electrical and plumbing codes, standards and accepted industry practice associated with PV and Solar Heating installations.

Equal Opportunity Employer/Program

Auxiliary aids and services are available upon request to individuals with disabilities.

This training program qualifies the student to sit for the NABCEP Entry Level Exam. From the NABCEP Website: The NABCEP Solar Heating (SH) Entry Level Exam is based on a set of Learning Objectives. These were developed by a committee of Solar Thermal subject matter experts and an industry wide validation identified them as appropriate and relevant for Solar Heating Entry Level education and knowledge assessment programs. The NABCEP Entry Level Exam covers the Solar Heating Learning Objectives and achieving a passing score on this exam will indicate that the candidate has demonstrated basic knowledge of the fundamental principles of the application, installation, design and operation of Solar Heating Systems in North America. NABCEP will periodically review the Learning Objectives and will notify the Provider of any modifications to the Learning Objectives.

2013011

Solar Thermal - June 2013

Instructor: Matt Bullwinkel

Training Location: SUNY Canton - CREST
34 Cornell Drive
Canton, NY 13617

Classroom Dates: 6/24/13 8 AM - 5 PM
6/25/13 8 AM - 5 PM
